The Mystery of the Energy Gobblers

Are there energy gobblers in your house that are eating up your family's energy? Use the clues below to find these gobblers. Solve the mystery and help make the energy gobblers eat less energy and save the environment!

Clue #1

Lights gobble up energy if they are left on when no one is in the room using them.

How to Solve the Mystery

Take a look around your home. Are the lights being left on when no one is in the room? If so, turn them off. This will stop lights from gobbling up energy!

What I did to stop the energy gobbler: _____

Clue #2

The stereo and TV gobble up energy if they are left on when no one is using them.

How to Solve the Mystery

Do you see the TV or stereo on when no one is using them? If so, ask permission, then turn them off. This will stop them from gobbling up energy!

What I did to stop the energy gobbler: _____

CONGRATULATIONS! YOU SAVED ENERGY FROM BEING GOBBLED UP AND HELPED TAKE CARE OF THE ENVIRONMENT!

MY NAME: _____ **DATE:** _____

Keep looking for energy gobblers!

- ☐ Make sure to close the outside door tightly when you come into the house.
- ☐ Take baths less often, and try to run the shower water for less time.
